EDUCATION

De La Salle University – Dasmariñas **Dasmariñas, Cavite**
BS Computer Engineering (Specialization in Software Engineering) *A.Y 2021 - 2026*

- 4th Year Graduating Student

SKILLS & TECHNOLOGIES

Programming Languages: JavaScript, HTML, CSS, Python, PHP, C++, Java, Dart

Frameworks/Libraries: React, Tailwind, Node.js, Flutter

Data: SQL Server, MySQL

Tools: Git, GitHub, Postman, Docker

Networking & Systems: Networking Configurations, Active Directory

PROJECTS

Smart Pneumatic Rehabilitation Glove
Undergraduate Thesis Project (Ongoing)

- Developing a **pneumatically actuated soft robotic glove** for hand rehabilitation as part of an ongoing undergraduate thesis project.
- Designed system architecture integrating **ESP32 microcontroller**, pneumatic components, and **touchscreen-based UI** for exercise mode selection and intensity control.
- Programmed and simulated exercise workflows and control logic for assisted finger flexion and coordination exercises.

E-Commerce

- Built a **React-based e-commerce frontend** with product browsing, cart management, and order viewing features.
- Used **Axios** and **async/await** to integrate REST APIs and handle dynamic data rendering.
- Applied **component-based design** and **React hooks** to manage UI state and reusable components.
- Designed responsive layouts using **HTML, CSS, Grid, and Flexbox**.

Pet Grooming Service Platform

- Designed and developed a pet grooming service web application using **React** for the frontend and **PHP with MySQL (phpMyAdmin)** for backend services.
- Implemented multiple containerized services using **Docker**, including authentication (registration & login), admin dashboard, booking management, and homepage services, to simulate a microservices-based architecture.
- Enabled **API-driven communication** between services and practiced **modular system design** for scalability and maintainability.

Real-Time Emotion Detection System

- Built an **emotion detection system** using **Python, OpenCV, and MediaPipe**, processing real-time video input
- Utilized **MediaPipe** for **face detection and facial landmark extraction**, with OpenCV handling frame processing and visualization.
- Analyzed facial landmark patterns to **classify basic emotional states** and overlay results directly onto the live video feed

Active Directory & Windows Server Configuration (Academic Project)

- Deployed AD DS on Windows Server using virtual machines, configuring domain and forest setup.
- Created and managed **OUs, users, and groups** within a virtualized Active Directory environment.
- Configured **basic Group Policy settings** to manage access and behavior of domain-joined users.
- Troubleshoot **DNS, network, and domain-join issues** between Windows Server and client virtual machines.

TRAINING & CERTIFICATIONS

- **Syntax and Structure of C – Simply C**, Microchip University (2025)
- **Data Management with Data Lakehouse and Data Fabric**, De La Salle University – Dasmariñas (2025)
- **Data Science and Artificial Intelligence**, De La Salle University – Dasmariñas (2025)
- **Data Analytics Using Power BI**, De La Salle University – Dasmariñas (2025)
- **Deep Learning Fundamentals**, De La Salle University – Dasmariñas (2025)
- **Programming Logic Controller (PLC) Fundamentals**, De La Salle University – Dasmariñas (2025)
